

Plant a Tree

Certificate of appreciation: Connecticut Lottery Corp.

Real seeds of change have taken root, thanks to you. Your commitment to our Plant a Tree program is integral to our efforts. To date, we have planted over half a million trees—restoring important areas like the Upper Ouachita River and the Tensas River Forest Projects in Louisiana or the Return to the Forest Projects in Nicaragua—with 100% of your donation going directly to these projects. This means your participation is making a direct, positive impact for wildlife and people alike. Trees serve as vital homes for wildlife and act like little sponges, helping clean and slow floodwaters for downstream regions. Reforestation creates jobs and provides outdoors opportunities for local communities.

Your participation also allows us to improve air quality by reducing greenhouse gas emissions, like the ones produced from the electricity that powers your Dell products. It's just one way that we can continue making our products and our relationships strong, vibrant and sustainable for life.

Together with The Conservation Fund and Carbonfund.org, we thank you.
