

Plant a Tree for Me

"Thank you for participating in the 'Plant a Tree for Me' program. Your donation will help offset the estimated average carbon produced from electricity to power your product during its average lifetime. Dell provides 100 percent of funds raised through the program to The Conservation Fund and Carbonfund.org, non-profit environmental organizations that plant trees in sustainably managed forests.

"Dell is committed to environmental responsibility in all areas of our business and thanks you for participating in this initiative. We believe the customer experience starts with receiving the best value and continues with the knowledge that we are partnering with our customers to protect the environment throughout the life of their product."

A handwritten signature in black ink, appearing to read "Michael S. Dell".
